HPCL for the 3rd quarter ending 31.12.2001 compared to the previous year is due to the decline in international parity price of petroleum products, resulting in erosion in value of inventory as well as the net sales causing lower Profit Before Depreciation Interest and Tax (PBDIT), lower refinery margins due to sharp decline in product prices and provision of Deferred Tax in compliance with Accounting Standard-22. However, the situation in the current quarter has improved.
